

COMPANY PROFILE

PT OPELON GARMENT INDONESIA

PT OPELON GARMENT INDONESIA

is located at Jalan Leuwigajah no 239,
Cimahi 40533-Bandung, Indonesia

We are specialised in manufacturing
swimwear, sports and activewear
and other knitwear

With a land area of 9000sqm
and 6000sqm of factory building,
we have approximately 360 manpower

With a monthly capacity of
about 125,000 pieces monthly
we are exporting to USA, Europe, and
a small portion to the Middle East

Some of our customers are :
Mamiye Brothers Inc - USA,
Asics Europe BV - Netherlands,
Collin Jeans - Turkey,
Scapino BV - Netherlands,
Salewa Oberalp SPA - Italy,
Zagora GmbH & Co - Germany.

Some of the brands we are producing are Guess, Barbie, Disney labels, Flap Doodles,
Dutchy Sportswear, ASICS, Collins, Zagora, etc

Besides the export market, we also have an established brand of swim and activewear
for the domestic Indonesian market.

Under our brand OPELON and our licensed products from Looney Tunes and Cartoon Network,
our products are widely distributed in the leading department stores in the major cities of Indonesia.

RAW MATERIALS WAREHOUSE

Our raw material warehouse is storing all fabrics for our garment production.

Fabrics are coming from various sources, mainly from Indonesia, Taiwan and China.

Complying to the Customs regulation, our Company has the license for free import duty on imported fabrics used for garments which are exported.

Fabric qualities frequently used are :

Jersey in cotton, CVC, TC, Cotton/Spandex,
Nylon/Spandex, Nylon supplex/Spandex,
Polyester, Polyester/Spandex
Interlock in cotton, CVC, TC and polyester
Baby Terry in cotton, CVC, TC, Polyester/Spandex
French Terry and brushed fleece in CVC
Two way tricot in nylon/spandex
Closed mesh, small hole mesh,
fancy mesh in polyester and nylon

Our warehouse is equipped with regular fabric inspection machines and steam inspection machine. The steam inspection machine is used for fabric relaxation thus controlling the fabric shrinkage.

Fabrics are hundred percent inspected for detecting knitting defects, colour shadings, creasemarks, etc

INTERNAL TESTING ROOM

Our factory is also equipped with testing devices located in our internal testing room.

We have washing machines, crock meter, pull test device and light box

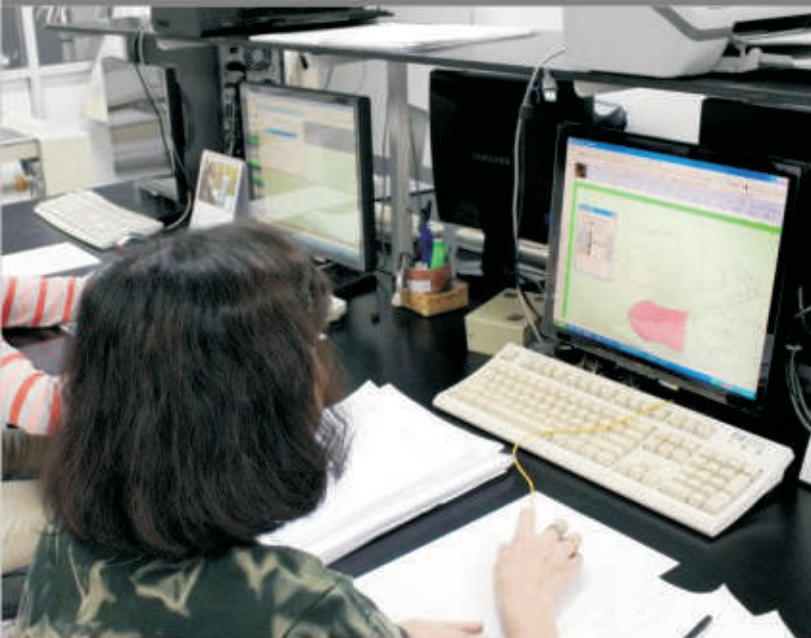

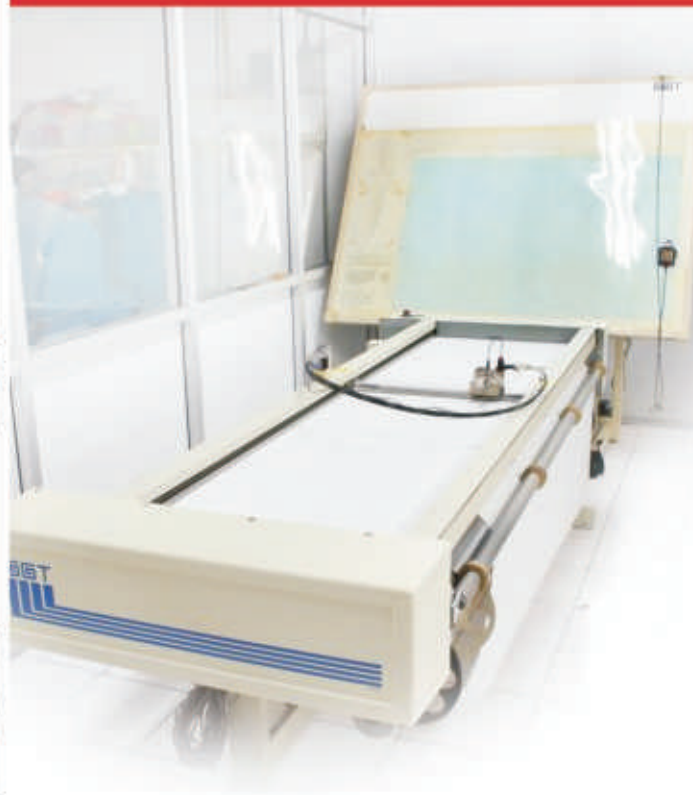

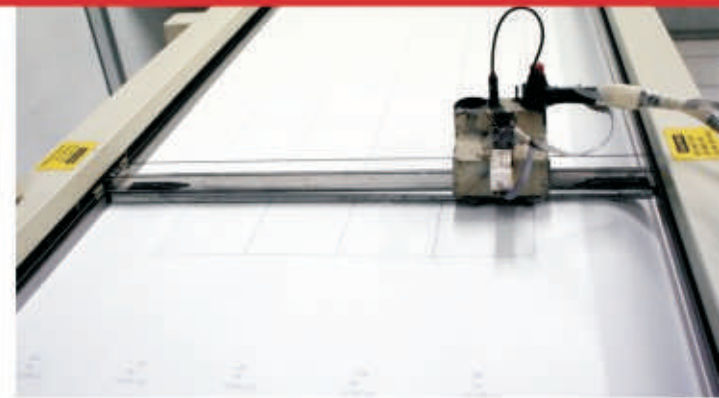

All fabrics are tested according to our buyers' quality requirements.

Some of the standard tests practiced are :
washing tests,
crocking on fabrics and artworks,
pull test on small objects
tests are conducted based on AATCC standard

SAMPLE ROOM

Our sample room is equipped with CAD systems from Gerber and Optitex

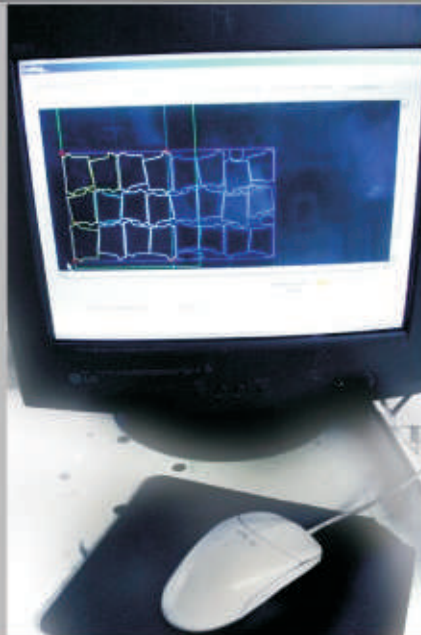

CUTTING ROOM

To achieve high efficiency and consistency, our cutting room is equipped with KAWAKAMI automatic spreading machines and auto cutter (CAM).

And for small parts and low qty orders, we are utilising our band knife for accurate and precise result.

And to maintain low defects in our finished garments, our cut pieces are fully inspected.

SEWING ROOM

Our sewing line which is the biggest department of the whole production system is equipped with a computerised unit production system or also known as the hanger system.

This allows us to lower our work in process thus allowing higher outputs of finished products.

This system also provides us with various datas allowing us to produce accurate forecast of our daily production yield which assist us in providing updated & timely production status to our customers.

With the increase in the demand of heat transfer prints, we have a few heat transfer press machines.

PACKING ROOM

Our packing room is equipped with steam irons,
needle detector from HASHIMA-JAPAN.

Goods are checked before they are finally packed
into export cartons.
